# EMBRACE

European Med-clusters Boosting Remunerative Agro-Wine Circular Economy

## Countries:

Italy, Bosnia and Herzegovina, Spain, Portugal, France, Slovenia, Greece

## Target Groups:

Agrofood and wine sector SMEs, Policy makers, sectoral agencies and BSOs, RTDs, intermediaries and experts

## Theme:

Food Systems

## Key Words:

Circular economy, agrofood, wine sector, eco-innovation, eco-canvas

## Starting and Ending Dates:

February 2018 – December 2020

The **EMBRACE** project aims at developing a model and implement one toolkit for the establishment of 2 transnational meta-clusters circular economy oriented in two leading sectors of the Med Economy: Wine and Agro-food. To strengthen the impact of the model and in general,

promote circular economy, business models for SMEs in the field of eco-innovation and related financing schemes have been developed and tested during the piloting phase and then disseminated during the transferring phase.

## Objectives

The Embrace project was put forward with the following objectives:

- Promote resource efficiency and eco-innovation for smart and sustainable growth, and support clusterisation of the EU economy.
- Foster the transition to a green and competitive circular economy.

What the eyes see, the mind believes.

## EMBRACE Project Partners:

## Challenges

The main challenge that the Embrace project faces is to make visible the intangible value of economic activities, by using the concept of circular economy and persuading stakeholders to take action in favour of what they cannot (yet) see. Recognising the fact that applying the circular econo-

my model is both a challenge and an opportunity for the agrofood sector in the Med area, Embrace increases the capital and leverages the capacity of regional players to implement new practices (at all levels), facilitating the transition from a linear approach towards the circular economy.

## Solutions

The Embrace project addresses common territorial solutions by:

- Establishing an innovative assessment and management tool to re-design business models and value chains in the wine and agrofood sectors.
- Providing services based on the empowerment of intermediary organisations working towards innovative solutions, and public actors to strengthen their knowledge on the circular economy and encourage them to implement eco-innovation policies.
- Proposing viable financial schemes to be adopted within the OP ERDF 2014-20, 2020+, and investment plans for eco-innovation projects, related services and business models for selected SMEs.

## Lessons learnt and recommendations

By capitalising on the expertise of Embrace partners, the project introduces and integrates the principles and practices of the circular economy in two leading sectors of the Mediterranean economy: agrofood and wine. Through the support of the innovation process and the introduction of a hybridisation between eco-design, resource efficiency and new spaces of value creation, Embrace aspires to provide advantages by shutting the exit points of value from regional value chains.

Engaging all players in the value chain is crucial. In order to increase the project's impact, Embrace adopts a multidimensional approach (from training stakeholders to introducing financial instruments and testing new business models), carried out by regional nodes and transnational clusters. This will accelerate the integration of the circular economy concept in the Med area, allowing the region's agrofood systems to increase their competitiveness.

### The InterregMED Green Growth Community

Green Growth is a thematic community that promotes sustainable development in the Mediterranean within the framework of the Interreg Med Programme. It supports the sound management of natural resources by enhancing cross-sectoral innovation practices through an integrated, territorially-based cooperation approach.

The community supports its projects in communicating and capitalising on their results to increase their impact at the policy level and ensure their potential transfer into other territories.
